# **Integrated Pest Management – Sustainable Park Improvements \$156,000**

---

## **PROJECT DESCRIPTION:**

The City Council approved a Pesticide Hazard and Exposure Reduction zone in 2006. Various Integrated Pest Management (IPM) and sustainable improvements have been earmarked in a number of parks and City-owned properties located in the Redevelopment Project Area. These funds will expedite these improvements and facilitate the Parks Department's efforts to maintain City parks and City properties in a "green" manner. Approximately \$136,000 will be used for IPM-improvements and \$20,000 will be used for signage geared towards educating the public. The additional \$101,000 comes from the 2003A bond fund.

## **PROJECT MANAGER:**

Brian Bosse,  
Redevelopment Supervisor

---

## **NOTES:**

The current balance is approximately \$156,000.
